WRITING PROMPTS

Participants are asked to write a Creative Short Story using The Sustainable Development Goals; students will find 17 options to choose from. They address the global challenges we face, including poverty, inequality, climate change, environmental degradation, peace and justice.

But... wait! We don't want a story where your creative characters are superheroes that face challenges and solve them with their superpowers. What we really want is a story where your characters are real life role models, who are immersed in a plot, regarding ONE of the 17 Sustainable Development Goals, that takes place in your own neighborhood, home, school, sports center, etc. with a real life, creative solution.

After reading your fictional short story, the reader should have the feeling that you have exemplified a way in which we can all collaborate with one of the Sustainable Development Goals in our day to day lives.
